

Risk Management Support

Risk management in a hospital is complex. It involves identifying, assessing, and averting risks in virtually every area of the hospital. This role is particularly difficult and important as new regulations take effect. Physicians are essential, but also present one of the hospital's greatest risks.

Since 2003, MDReview has effectively supported healthcare risk management professionals by delivering exceptional physician peer review. Our customized process, skilled and experienced staff, and superior team of physician reviewers and medical directors enable us to provide an unprecedented level of oversight and expertise for every project. Through this focused process, we work to assist our clients with developing and implementing safe and effective patient care practices and maintaining safe working environments.
